Statement of the standard GPA certificate

In recent years, Tsinghua University has advanced the reform of education and teaching by increasing the challenge of its curriculum and comprehensively implementing the reform plan of “establishing an academic evaluation system that improves the all-round development of students”. Starting from students enrolled in 2015, the record of course grades has changed from using percentages to using letter grades, and the instructors are also adapting to this new letter grades-based rating system.

In order to more accurately evaluate a student's academic level during this transition, the GPA calculation is standardized with respect to the piecewise distribution of all student scores over the years. The GPA reflected on the undergraduate standard GPA certificate of a student is obtained through comprehensive standardization based on his/her course grades (as recorded in the transcript). It is hereby stated.
